2.2.4. Property, Plant & Equipment

(a) Cost and Valuation

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses. Depreciation is charged so as to allocate the cost of assets less their residual values over their estimated useful lives.

Depreciation is calculated by using a written down value method on cost for Buildings, Plant, Machinery and Equipment, Lab equipment, fire extinguishers, molds & dies and electric equipment in order to write off such amounts over the following estimated useful lives. Straight-line basis is used for furniture and fittings, office equipment and computers. The principal annual rates used are,

Buildings	10.00%
Plant, Machinery & Equipment	27.82%
Furniture and Fittings	20.00%
Office Equipment	20.00%
Lab Equipment	13.91%
Computers	20.00%

At each reporting date, property, plant and equipment, intangible assets, and investments in associates are reviewed to determine whether there is any indication that those assets have suffered an impairment loss. If there is an indication of possible impairment, the recoverable amount of any affected asset (or group of related assets) is estimated and compared with its carrying amount. If estimated recoverable amount is lower, the carrying amount is reduced to its estimated recoverable amount, and an impairment loss is recognized immediately in profit or loss.

Contd...(09)

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31ST MARCH, 2020

Impairment of Assets (Contd...)

Similarly, at each reporting date, inventories are assessed for impairment by comparing the carrying amount of each item of inventory (or group of similar items) with its selling price less costs to complete and sell. If an item of inventory (or group of similar items) is impaired, its carrying amount is reduced to selling price less costs to complete and sell, and an impairment loss is recognized immediately in profit or loss.

If an impairment loss subsequently reverses, the carrying amount of the asset (or group of related assets) is increased to the revised estimate of its recoverable amount (selling price less costs to complete and sell, in the case of inventories), but not in excess of the amount that would have been determined had no impairment loss been recognized for the asset (group of related assets) in previous years.
