Operations

The Company was able to deliver a resilient operating performance in Q1 on the back of good demand for the Company's products. Demand from OE Manufacturers was buoyant as Vehicle sales across segments witnessed strong growth. Replacement sales was also healthy as demand continued to be robust. However, higher input costs impacted profitability during the quarter.

The Company has taken price increases and cost management measures in this quarter which helped to partially offset cost increases. Raw Material prices continue to remain firm due to the ongoing conflict in the Middle East. The impact of higher costs on margins is expected to continue.
